

VibroGym® Professional II

A professional vibration training device that can be put to use in gyms, physiotherapeutic practices, sports and health institutions, as well as wellness and beauty centers. Just as for the VibroGym® Professional I – the development team of VibroGym® applied the highest standards to this machine. In addition to the technical requirements, the creative process conducted by the engineering and product design team – which belongs to the experienced development department at VibroGym® – was influenced by the latest workout concepts of physiotherapists as well as by comprehensive exercise analyses on the part of sport clubs, health clubs, and wellness centers. The result of these efforts once again demonstrates the innovation and technology leadership of VibroGym®.

TECHNICAL SPECIFICATIONS

Material	Aluminium construction – made from a single, solid aluminum precision cast
Dimensions (w x d x h)	900 mm x 1000 mm x 1400 mm
Weight	86kg / 172lb
Voltage	110-130V and 220-240V
Power consumption	350 Watt
Maximum Load	300 lb / 150 kg
Frequency Range	25 -50 HZ
Force	2,2 kN / 3,9 kN
Colour (standard)	Silver-grey or black
Operation	Membrane keyboard
Warranty	1 year
